

DEBRIS LOADERS

An ECHO Bear Cat Debris Loader allows commercial operators, municipalities, and golf course workers to quickly pick up leaves, grass, or other light debris, and load it into the back of a truck at the same time. Available in a variety of engine sizes and either 2" receiver mount or highway-towable, there's an ECHO Bear Cat Debris Loader for every application. All models feature flexible, heavy-duty hoses with a lightweight aluminum handle and a scrolled fan housing for more efficient air transfer.

Accordion style pick up hoses feature lightweight aluminum handles and a wide-open mouth

Large 15" tires and torsion axle suspension make for smooth road-towing

A four-blade 16" or 20" radial fan, coupled with a powerful engine, generates maximum CFM

Secure holders keep the hose in place while transporting the unit
